## Work Done

---

**Equipment:** SR-Lake 3 (Service Report)

**Description:** Today I did a treatment for the algae. You should see some improvement over the next few days. The submerged weed treatment from last visit was successful. No further curlyleaf pondweed growth observed. Water parameters were measured and recorded in the service report. There was a significant amount of grass clippings in the lake, see attached photos. Please keep these out of the water as the excess nutrients causes extensive algae growth. Thanks,
